

Rory had an 0.8 snow cone after school. Savana had a 0.43 snow cone. How much more did Rory have than Savana?

Kelstyn wanted to see the difference between her longest and shortest slimes. If the red slime was 13.84 inches long, the blue slime was 11.9 inches long, and the green slime was 3.548 inches long; what was the actual difference between the longest and shortest slimes?

Tegan and Noah can't seem to agree on a math problem they did for homework last night. Tegan says that  $15.4 - 1.39$  is 14.01. Noah says he's wrong and that the answer is 0.25. Show which person is right and explain how one of them is wrong.
