

Practice with Remainders

Sally went to the grocery store and scooped out forty-three pieces of candy. She wants to divide the candy evenly among her AND her six friends. How many pieces of candy will each person get? Will any be left over? Draw a picture to go with your answer.

Your family wants to have a picnic on Sunday at the park. You need to setup enough benches for 25 people. Each bench can hold seven people. How many benches would you need for the picnic? Draw a picture to go with your answer.

Mrs. Chapman bought sixty pencils over the weekend. She has 9 students that need the pencils. How many pencils will each student get? Will there be any pencils left over? Draw a picture to go with your answer.

Ethan wants to have pizza at his birthday party this
