

Lesson 14: Missing Numbers in Subtraction

<p>Ethan had a collection of arrowheads. He decided to give Faith 17 from his collection. Ethan now has 56 arrowheads left. How many arrowheads did Ethan have BEFORE he gave 17 to Faith?</p>	<p>1) Write an _____.</p> <p style="text-align: center;">_____ = _____</p>
<p>2) If the variable comes FIRST, _____ the two numbers from your equation.</p>	<p style="text-align: center;">_____ = _____</p>
<p>Ethan had a collection of 73 arrowheads. He gave Faith some of the arrowheads he owned. Ethan now has 56 arrowheads in his collection. How many arrowheads did Ethan give to Faith?</p>	<p>1) Again, write an _____.</p> <p style="text-align: center;">_____ = _____</p>
<p>2) If the variable comes SECOND, _____ the two numbers from your equation.</p>	<p style="text-align: center;">_____ = _____</p>
<p>3) Checking your _____.</p> <p>You can _____ the numbers to make an addition problem.</p>	<p style="font-size: 1.2em; font-weight: bold;">68 - 45 = 23</p> <p style="font-size: 1.2em; font-weight: bold;">23 + 45 = 68</p>
