

More Work on Separating Word Problems

Andrew had \$28. After he spent \$12 at Pizza Hut, how much money did Andrew have?

How would we write an equation for this problem?

Try to think of separating problems as:

Some
- _____ went away

What is left?

Some - _____ went away = What is left

_____ - _____ = _____

After losing 40 pounds, Mr. Taylor still weighed 180 pounds. How much did Mr. Taylor weigh before he lost the weight?

Some - _____ went away = What is left

_____ - _____ = _____

25 runners started the race, but some runners dropped out along the way. If 19 runners finished the race, then how many runners dropped out of the race?

Some - _____ went away = What is left

_____ - _____ = _____
