

Ready® Mathematics**Lesson 4B Quiz****Solve the problems.**

- 1**
- Which of the following describes the model shown?

Circle all the correct answers.

A $\frac{56}{100}$

C 5.6%

B $\frac{1}{56}$

D 56%

- 2**
- A survey asked if people had vacationed at the beach. The circle graph shows the results. Complete the table below. Write the percent, an equivalent fraction with a denominator of 100, and an equivalent decimal for the number of people who have vacationed at the beach.

Response	Percent	Fraction	Decimal
Yes			

Lesson 4B Quiz continued

- 3** Shade the model below to show 23%. Describe how the model shows the percent.

- 4** Jasmine has read 65% of the pages assigned for reading. Is that less than $\frac{3}{4}$ of the total amount assigned, exactly $\frac{3}{4}$, or more than $\frac{3}{4}$? Explain how you know.

- 5** Sean is assembling a piñata. 20% of the candies in the piñata are chocolate.

Part A

If the piñata will contain 100 pieces of candy, how many pieces will be chocolate?

_____ pieces

Part B

Fill in the blanks to represent the amount of chocolates as a fraction and a decimal. Explain how you how you found each number.

Percent: 20% Fraction: _____ Decimal: _____
