

## Lesson 8: Relationship Between Adding and Subtracting

Subtraction - Taking from a \_\_\_\_\_ number. If I had ten cookies, and my family ate eight of them. How many would be left for me?

Subtraction Number Sentence: \_\_\_\_\_ matters when subtracting. The \_\_\_\_\_ number always goes first. Also, the answer for a subtraction problem is known as the \_\_\_\_\_.

$$10 - 8 = 2$$
$$\begin{array}{r} 10 \\ -8 \\ \hline \end{array}$$

Inverse Operations - One operation \_\_\_\_\_ the other.
