

Ticket price to enter your amusement park:

Cost of a meal plan:

Cost of a drink:

If 3,245 people come to your park, what would be the total amount you made on ticket sales?

Assuming 125 families of four bought a meal plan and two drinks. How much extra money did the park make that day?

The cost to run the park each day is \$189,456. How much profit would your park make in one day based on the information you've gathered so far.
