

Algebra: Find the Perimeter of a Shape

Notes

1) If you know the measurement of each side, **add** up all the sides of the figure.

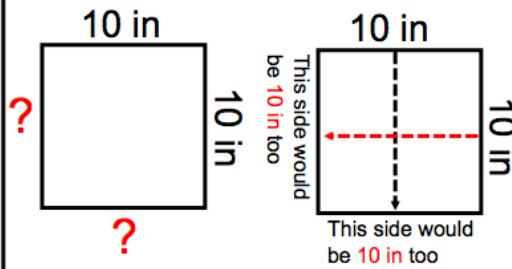

Practice

2) What do I do if some numbers are missing?

Well, if you're finding the perimeter of a **rectangle** or a **square**, the opposite side of the figure are the **SAME LENGTH**.

Once you know the length of each side, **add** all the sides of the figure.

Okay, let's practice. Find the perimeter of each figure.

Work:
