

Reading Skill Focus: Sequencing

When we SEQUENCE, we put events in the order that they occurred.

OBSERVE IT!

ANSWER IT!

In the correct order, write one or two events that happened **BEFORE** the picture, two events being shown in the picture, and two events that happened **AFTER** the picture. The events should combine to make a short story about the kids baking!

BEFORE

DURING

AFTER

APPLY IT!

Mom was in charge of making brownies for the bake sale. After the kids went to bed, she headed to the store. She got all of her ingredients, paid for her goodies, and headed home. Mom laid all of the ingredients out on the counter and got ready to bake. First, she sprayed the pan with non-stick spray. Then, she got two bowls out. In the first bowl, she put all of the liquid ingredients. In the second bowl, she put all of the dry ingredients. After that, she mixed them both together. When the mix was complete, she poured the batter into the pan. She put the pan in the oven and set the timer for 45 minutes. When the timer beeped, she pulled the pan out and let the brownies cool for an hour. While she waited for them to cool, she watched a show. Finally, the last timer beeped, and she was able to cut the brownies and put them on a plate!

ANSWER THE QUESTIONS BELOW.

What happens immediately after the kids go to bed?

What happens right before mom sprays the pan?

What happens after she gets the pan out of the oven?

What happens before she cuts the brownies?
